This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

+ *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.
+ *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.
+ *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.
+ *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

About Google Book Search

Google's mission is to organize the world's information and to make it universally accessible and useful. Google Book Search helps readers discover the world's books while helping authors and publishers reach new audiences. You can search through the full text of this book on the web at `http://books.google.com/`

PREFACE.

The "Subject Index of the modern Works added to the Library of the British Museum in the years 1881–1900" was published by the Trustees of the British Museum in three volumes in 1902 and 1903.

It is proposed to continue this work by the issue of three volumes in the years 1906, 1911 and 1916, each covering the period of five years immediately preceding its publication. In the year 1921 these three volumes will be incorporated in a Subject Index for the period of twenty years from 1901 to 1920 inclusive.

The present volume forms the first of the proposed Issue. It contains the titles of books published between January 1901 and December 1905, together with those of books issued between 1881 and 1900 which have been acquired since the publication of the Subject Index for 1881–1900.

The number of entries in the volume is 51,400, and, as the former Index contained 155,000 entries, students have now at their disposal a classified list of 206,400 books representing the recent literature of all countries of European or Western civilization.

The general plan of arrangement follows as closely as possible that of the Subject Index for 1881–1900, and the reader is referred to the preface to that work for an account of the classes of books included in the Index and of the system of classification which has been adopted.

An Index of books published during a limited number of years must necessarily be incomplete as a record of the literature of earlier periods; but this drawback to the utility of the British Museum Subject Index is to some extent modified by the fact that during the last quarter of a century large numbers of early books of value and interest have been re-edited or reproduced in one form or another. All new editions of books originally published before 1881, and reprinted between that year and the end of 1905, are included, and the reader will consequently find, in addition to the latest books on each subject, many of the more important authorities of earlier periods.

Digitized by Google

But incomplete as these volumes must remain as regards books published before 1881, they contain perhaps the most complete and exhaustive bibliographies extant of the recent history of the world and of the discoveries, inventions, intellectual progress and controversies (political, social or theological) of the last twenty-five years. To select only a few examples, there will be found in these pages references to the great majority of the books which have been issued up to the close of last year on such widely different subjects as the War in South Africa, 1899–1902, the War between China and Japan, 1894–1895, or the War between Japan and Russia, 1904–1905, on the present state of the Russian Empire, on Motors, Electric Railways, Submarine Navigation, Air-ships, and Radio-Activity.

The Editor has had the valuable co-operation of several members of the staff of the Department of Printed Books in compiling this volume. He desires especially to express his obligations to Messrs. R. F. Sharp, R. A. Streatfeild, and W. A. Marsden, for their assistance in the preparation and revision of the entire work, and to Mr. R. N. Bain, who has undertaken all the Slavonic portions of the book.

G. K. Fortescue.

October, 1906.

NOTE.

Under each country subheadings will be found for works on the following subjects: The Antiquities, Army, Colonies, Constitution and Government, History, Law (general systems and codes), Navy, Politics, Social Life, Topography, Trade and Finance of each country.

On the other hand separate headings have been made for works on the following subjects, which will consequently be found under such headings and not under the names of the various countries: Agriculture, Architecture, Art, Ballads, Biography, Birds, Botany, Capital and Labour, Drama, Education, Local Fauna (under Zoology), and Flora (under Botany), Folk Lore, Forestry, Geology, Heraldry and Genealogy, Land Tenures, Law (Criminal, Commercial, Ecclesiastical, Maritime, Military and Naval), Law Reports, Mineralogy, Numismatics, Painting, Police, Railways, Sport, Succession and Probate, Typography.

Art Galleries, Exhibitions and Libraries have been grouped together under the headings "Exhibitions" and "Libraries," and have not been placed under the countries or towns in which they are situated. Private Collections of objects of Art will be found under the heading "Collections and Collectors."

Many abbreviations have been used throughout the work. Most of these are sufficiently intelligible, but the following may require explanation:

Ac.	for Academies.
Ephem.	„ Ephemerides.
G.B. and I.	„ Great Britain and Ireland.
P.P.	„ Periodical Publications.
U.S.A.	„ United States of America.
